

Physiotherapy and Home Ventilation Services

Online Webinar

Dr Chan Yeow

Senior Consultant, Department of Anaesthesiology,
Intensive Care & Pain Medicine

Director, Home Ventilation & Respiratory Support Service
Tan Tock Seng Hospital

Dr Chan Yeow has been the Clinical Director of the Home Ventilation and Respiratory Support Service (HVRSS) since its founding in 2009. HVRSS provides complex chronic ventilatory care for people with neurological disorders, neuromuscular disorders or spinal cord injury. The mission of HVRSS is not just to prolong survival, but to make each day as comfortable and fulfilling as possible for the ventilation users.

Ms Nurul Aini Bte Bari

Senior Physiotherapist
Singapore General Hospital

Nurul Aini joined SGH in 2010 and has completed her MSc in Advanced Physiotherapy (cardiorespiratory) with University College London in 2020. In 2015, she was awarded the HMDP Fellowship in Multidisciplinary Tracheostomy Team and had the opportunity for an overseas stint in Melbourne, Australia.

Currently, the team she is in oversees various patient population which includes the respiratory medicine, renal medicine and oncology population, both inpatient and outpatient settings. Her interest includes critical care rehabilitation, tracheostomy-related matters and chronic respiratory medicine rehabilitation.

Ms Tricia Yeo

Senior Physiotherapist
Community Rehabilitation Programme
Tan Tock Seng Hospital Rehabilitation Centre

Tricia graduated with a BSc (Hons) Physiotherapy and is currently a Senior Physiotherapist providing home therapy with the Community Rehab Programme. In her 12 years of clinical experience, she has worked in various rehabilitation settings including the acute and sub-acute hospitals as well as home-based care. Seeing clients through this continuum has shaped her holistic approach in their care. As a community-based therapist, Tricia has experience in working with clients across varying conditions and mobility challenges. She believes in a person-centred approach towards achieving an individual's goals.

Mr Tay Hung Yong

Physiotherapist
Rehab Paradigm

Hung Yong had practised in a hospital and non-profit organisation setting for 22 years since graduating in 2001. His interest in exercise therapy and cardiac rehabilitation had led to his pursuit of a Masters in Preventive Cardiology from Imperial College London. He managed the cardiac rehabilitation programme (CRP) in the National University Hospital Singapore (NUHS) and Singapore Heart Foundation (SHF), where he cared for patients who suffer from heart conditions and other chronic diseases. Currently, he sees geriatric, neurological, cardiac and chest cases in their home environment as well as in clinics.
